Pediatric Pulmonology 11:381–383 (1991)

Subject Index to Volume 11

Affects of age and disease stage, 44
Air quality near power stations, 134
Airway occlusion, 217
Airway reactivity, carbachol, citric acid, histamine, 56
Airway resistance, 108, 202
ALTE incidence, 328
Albuterol bronchodilator, 29
Alpha-1-antitrypsin, 249
Alpha-1-antitrypsin deficiency, 212
Alveolar ventilation, 198
Alveolar-arterial O_2 gradient, 223
Alveolar-ductal respiratory air space, 318
Anatomical dead space/tidal volume, 198
Anesthetized piglets, 113
Antineutrophil elastase activity, 249
Apnea density, 328
Apnea in infants, 195
ARDS-pathogenesis, 302
Arterial oxygen and carbon dioxide tension, 335
Asthma, 127, 134
Asthma near power stations, 127
Asthmatic vs. non-asthmatic subjects, 22
Asthmatics, healthy controls, 345
Asynchrony in sleep studies, 141
Atopy, 127
Attention, impulsivity, memory, fine motor control, activity level, 233

Bacterial tracheitis, 87
Barotrauma, 120
Body plethysmography, 202
Book Reviews, 187, 283
Bradycardia in infants, 195
Bronchial hyperreactivity, 8, 29
Bronchial reactivity, 127
Bronchial responsiveness, 22
Bronchiectasis, mucoid impaction, 81
Bronchodilator response, 49, 212
Bronchopleural fistula, closure of, 280
Bronchopulmonary dysplasia, 8, 37, 141

Calculated vs. observed changes in respiratory mechanics, 272
Caucasian versus Afro-Caribbean asthmatic children, 207
Central apnea and hypoventilation, 141
Central neurologic disease, 310
CF serum IgG to *P. cepacia*, 289
CF-related lung disease, 249
Chest wall motion, 37
Chest x-ray score, clinical score, 81
Chestwall, lung, respiratory system, 294
Child, 310
Child behavior checklist correlations, 243
Children in polygraphic sleep studies, 141
Children with acute respiratory failure, 103
Chronic lung disease, 198
Chronic pulmonary oxygen toxicity, 318
Clinical course by subtypes, 98
Clinical observation, 195
Clinically chosen PEEP, PEEP at normal FRC, 103
CO_2 removal, 335
CO_2 response in piglets and opioids, 113
Cobra venom factor, 302
Community health services, 310
Complement activation and lung injury, 302
Compliance, 294
Compliance, resistance, 56
Computed tomography, 175, 181
Congenital anomalies, 310
Congenital diaphragmatic hernia, 49
Continuous airway pressure, weighted spirometer, change in FRC, 345
Control of breathing, 217
Controlled hypoventilation, 120
Correlation of Ptc_{O_2} and FEV_1, 254
Coughing, wheezing, 202

Daily environmental SO_2, NO_x levels, 134
Deflation flow-volume curves, 49
ΔPdiff, 108
Demographics, 98
Dexamethasone, 87
Diaphragmatic hernia, 223
Differential diagnosis, 175
Dose-response curves, 254
Dose-response slope, 22
Down's syndrome, 141
Dynamic compliance, 15
Dynamic lung compliance, 198
Dynamic respiratory system compliance, 108

Effect of age, 56
Effect of PDA on pulmonary mechanics, 161
Effect of time on mechanical ventilator, 8
Effects of RSV on lungs in lambs, 56
ELISA, 289
Endoscopic diagnosis, 280
Endotracheal intubation, 87
Endotracheal tube size, 15
Environment, 127
Epithelioid hemangioendothelioma, 181
Error of estimates (compliance), 147
Esophageal manometry in infants, 350
Extracorporal membrane oxygenation (ECMO), 108, 223

Factors in development of asthma, 22
Family, 310
Fetal rabbit, 153
Flexible fiberoptic bronchoscopy, 280
Flow volume curves, volume of isoflow, 340
Fluorescein-isothiocyanate labeled bovine-serum-albumin, 153
Fluorescent vs. non-fluorescent cross-section areas, 153
Forced deflation technique, 8
Forced expiratory volume and flows, 29
Forced oscillation technique, 1
Functional residual capacity, 198, 202, 207, 212, 294

Gas exchange during high-frequency oscillation, 335
Gas trapping, 202
Group-by-treatment interactions, 233
Growth, maturation, 294

Heart rate, 113
Helium dilution, 202, 207, 212

© 1991 Wiley-Liss, Inc.

Hering-Breuer inflation reflex (HBR), 217
Hering-Breuer reflex in children, 345
High-frequency chest compression therapy, 265
Home visits, 310
Hyperinflation in children with liver disease, 212

"Ideal" vs. measured body weight, 29
Immunoaffinity chromatography, 249
Immunoblotting, 289
In-service education, 195
Indomethacine treatment, 161
Infants with asthma vs. controls, 1
Inspiratory time, 15
Inspiratory time and pulmonary function, 198
Intermittent flow ventilation, 15
Interrupter technique, 108
Intravascular bronchioloalveolar tumor, 181
Intravenous bronchodilators, 120
IQ, overall language quotient, 243

Least squares regression, 147
Liposome-encapsulated catalase, 318
Lissajous loops, 259
Logistic regression, 134
Longest apnea duration, 328
Longitudinal changes in lung function, 8
Lower airway obstruction, 49
Lower respiratory tract infections, 44
Lung compliance per body weight, 37
Lung function follow-up in symptomatic preterm infants, 202
Lung histology, 56
Lung hyperventilation, 207
Lung mechanics, 37, 56
Lung resistance, 37, 198
Lung tumor, 181
Lung volume, 56

Marfan syndrome, 29
Maximal expiratory flow-volume curves, 8
Measurement of airway responsiveness to methacholine, 254
Measurement of infant respiratory mechanics, 149
Mechanical ventilation, 103
Mechanical ventilation in status asthmaticus, 120
Mechanically ventilated infants, 147
Meclofenamate pretreatment, 302
Methacholine, histamine challenge, 22
Methacholine challenge, 29
Minute ventilation, 113
Modified passive mechanics technique, 49
Monitoring device for ventilated children, 272
Mucous clearance, 265
Mycoplasma pneumoniae, 44

Naltrexone, 113
Nasal CPAP, 259
Nasal impedance, 1
Neurological status, 243
Neuromuscular disease, 310
Nitrogen mustard, 302

Odds ratios, 134
Outcome and process assessment, 310
Outer membrane antigens, 289
Overall accuracy, 223
Own blood-acrylic glue mixture, 280

Parental education, occupation, 243
Parentally reported behavior, 233
Passive expiratory flow technique, 161
PEEP, 15
PEFR measurements in respiratory disease, 166
Peak inspiratory pressure, 223
Pediatric Pulmonology News, 95, 193
Periodic breathing, 328
Perspectives, 97
Phase angle asynchrony index, 37
Phase angle of asynchrony, 259
Phone surveys, 310
Physiological monitoring systems, 272
PIP, 15
Pneumocardiography, 195
Polyacrylamide gel electrophoresis, 249, 302
Polygraphic sleep studies, 141
Polymorphonuclear leukocytes, 302
Polysomnography, phase angle technique, 141
Porcine pancreatic elastase complexes, 249
Positive predictive value, 223
Postnatal illness severity, 243
Predicted values, 29
Predictive value, 254
Prematurity, 243
Prenatal cocaine and SIDS, 328
Pressure-volume, pressure-flow, flow-volume loops, 272
Prevalence of wheezing, cough, breathlessness, 134
Primary pulmonary disease, 310
Procedure under sedation, 280
Prostaglandin E_2, 302
Pulmonary arterioles, 318
Pulmonary complications of CF, 265
Pulmonary function (FEV_1), 233
Pulmonary function in thalassemia major, 340
Pulmonary hypoplasia, 175
Pulmonary mechanics of neonates on ECMO, 108
Pulmonary O_2 toxicity prevention by catalase, 318
Pulmonary underdevelopment and accessory diaphragm, 177

Ratio of nasal to total respiratory system resistance, 1
Regional pulmonary blood flow cycles, 153
Relationship, tracer circulation time, 153
Repair of CDH, 49
Reproducible, stable lungs injury model, 335
Resistance, 15, 49
Respiration, artificial, 310
Respiratory inductive plethysmography, 37, 259
Respiratory mechanics in piglets, 294
Respiratory reflex, 217
Respiratory syncytial virus (RSV), 98
Respiratory syncytial virus infection, 56
Respiratory system compliance, 49, 103
Respiratory system compliance and resistance, 161
Respiratory system mechanics, 217
Restrictive defects, 49
Roentgenography, 175
RSV infections, 44
RSV subtypes in children, 98

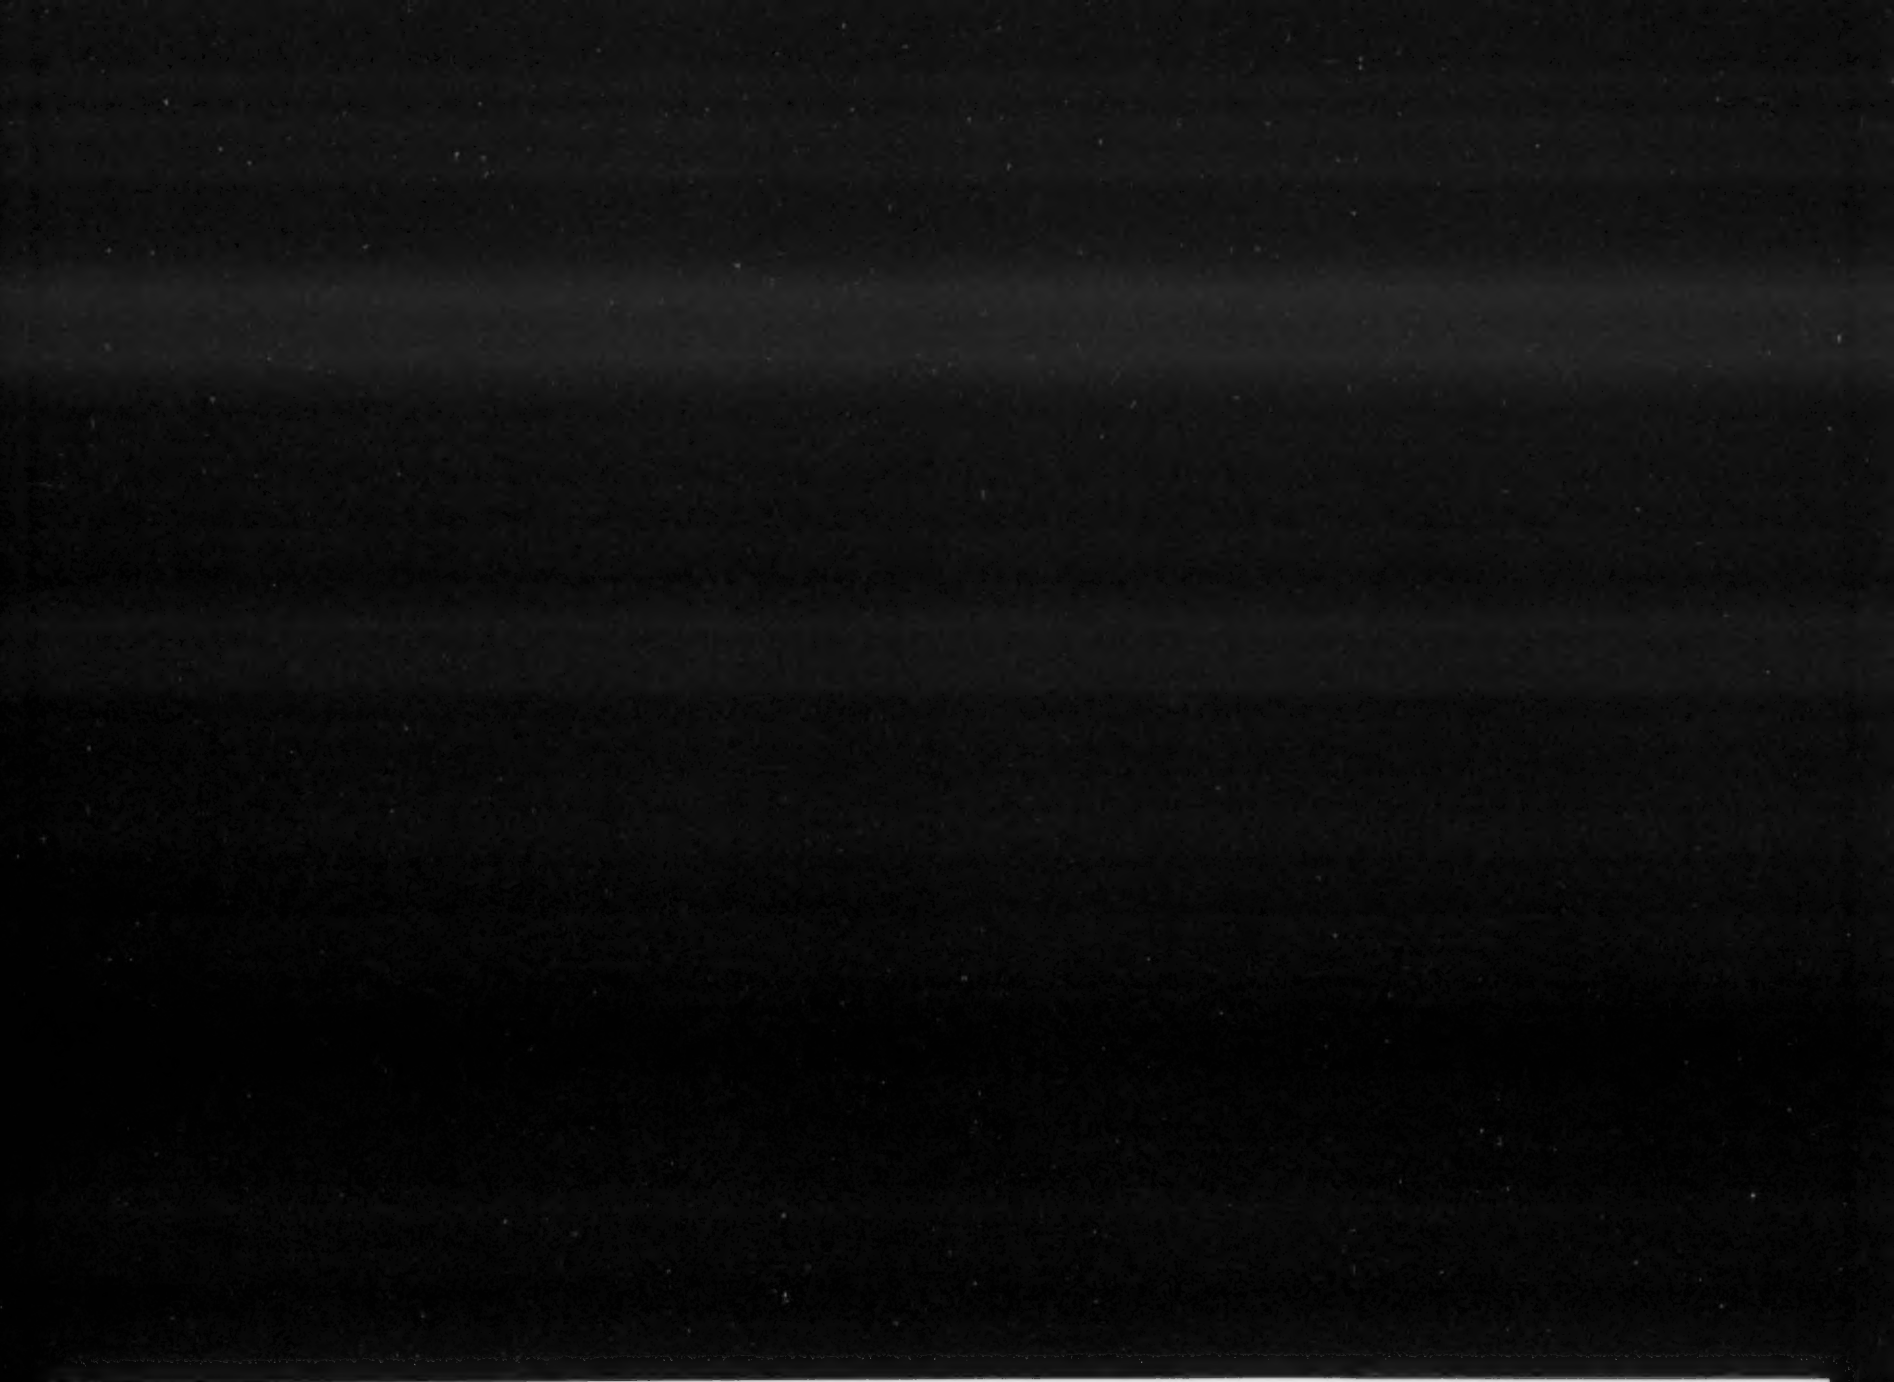
Selected Abstracts, 90, 189, 361
Self-administered vs. manual chest PT, 265
Self-reported mood, 233
Sensitivity, 223
Serum IgE levels, 44
Serum neutralization titers, 56
Simulated resistance, compliance, inertance, 147
Slope and shape of loops, changes of, 272
Small airway obstruction, 340
Smaller airway obstruction, 8
Specificity, 223
Spontaneous changes in bronchial responsiveness, 22
Staphylococcus aureus, 87
Stepwise multiple regressions, 243
Subtype A, B frequency, 98
Superoxide dismutase glutathione peroxidase, 318
Surfactant replacement therapy, 65

T-tests, 243

Technology-dependent children, 310
Theophylline and asthmatic children's behavior, 233
Thoracic gas volume, 202
Thoracoabdominal motion, 259
Tidal volume, 15, 113, 198
Time-related FVC, FEV_1 slopes in % predicted, 265
Total and specific IgG titer, 289
Tracheostomy outcome predictors, 243
Transpulmonary pressure, 259
Triclofos sodium, 217
Two-compartment model, 108

Ultrafast computerized tomography in CF, 81
Undetected apneas and bradycardias, 195
Upper airway obstruction, 141

Variability of nasal resistance, 1
Varied rise time of pressure pulse, 147
Ventilated infants, 161
Ventilator settings, 15
Volume densities, parenchyma, air space, 318

Weight and volume corrected, 103
Wheezy vs. non-wheezy patients, 44


Year-long study, 134
